Thirty-Two Years of Steady Progress
And Constant Improvement

THIS TELLS IN BRIEF
THE HISTORY OF

The Paper Mill and Wood Pulp News

A BRIGHT, newsy, interesting entertaining and instructive weekly newspaper, published in the interest of : : : : : : : : :

THE PAPER, PULP AND CHEMICAL FIBRE INDUSTRIES, and .....

The Leader in This Field

Read by everybody identified with the industry; regarded by builders of pulp and paper making machinery and appliances, and dealers in mill supplies, as PREEMINENTLY THE MEDIUM by which to reach mill owners and managers. Its columns are 14 inches deep and 2½ inches wide and its pages contain 56 inches of type matter, just twice the size of any other publication in this field.

Subscription $3.00 a Year

L. D. POST, Publisher and Proprietor

Tribune Building, New York City

Telephone 4524 Beekman P. O. Box 592

EACH YEAR

immediately after the annual meeting of the American Paper and Pulp Association and of the National Paper Trade Association there is published the

CONVENTION NUMBER OF

THE PAPER MILL AND WOOD PULP NEWS

IT is always a handsomely printed, beautifully illustrated paper, several times larger than the regular number, and, besides full reports of the proceedings of the American Paper and Pulp Association and of the National Paper Trade Association, it contains much valuable and interesting reading matter that constitutes the

REAL LITERATURE OF THE INDUSTRY

Builders of pulp and paper making machinery and appliances have long since come to recognize the immense value of the Convention Number of THE PAPER MILL as an advertising medium. Moreover, this is a regular issue, and the rights of all regular advertisers are safeguarded.

OF THE

Paper and Pulp Industry

Post's Paper Mill Directory

This volume, published annually, is conceded by authorities to be the "Standard Reference Book" of the American paper and pulp industry. It contains nearly 700 pages, is bound in cloth, and sells at the low price of $2.

It is a working library for every one connected with paper and pulp industry, and a glance over the table of contents gives one a clear idea of the wide scope of the book and the complete character of the information that it contains.

Its leading feature, of course, is its reports of the paper and pulp manufacturing establishments of the United States and Canada.

Paper Mills

In this department are given reports from every paper making plant in the United States and Canada, recording in each case its location, its shipping facilities, the names of the mill's officers or owners, its equipment, the kind of paper it makes, the width of the trimmed sheet, and the quantity of paper produced in twenty-four hours.

Pulp Mills

In this department are set forth the location, shipping facilities, names of the officers or owners, equipment, and the kind and quantity of pulp made in every mill in the United States and Canada.

Classified Lists of Tonnage

Immediately following the mill report department are the classified lists of mill products, there being shown under the name of each grade of paper the mills engaged in making it. This enables one to see just what plants are making a given grade of paper, and a reference to the mill report of the mills in question gives the details as to width of sheet, quantity, etc. The classified lists of pulp mill tonnage do a similar service for the seeker after pulp product.

Converters of Paper

This department gives the names and addresses of houses making coated paper, vegetable parchment, cardboard, waxed papers, envelope manufacturers, etc.

Paper Houses Carrying Stock

At the request of the National Paper Trade Association, and in cooperation with the secretary of that organization, there was established in the book a department devoted to the names

and addresses of the paper houses in the United States that carry stocks. Post's Paper Mill Directory is the only book containing such a list.

Dealers in Paper

Besides the department listing houses carrying stock, there is also one giving the names and addresses of dealers in paper, commission merchants, brokers, mill agents, and in the large cities, the local offices of paper mills.

Paper Stock and Rag Dealers

The names and addresses of the paper stock and rag dealers of the United States and Canada are arranged in a manner similar to those of paper dealers.

Paper Box Makers

In this section are given the names and addresses of the paper box makers of the United States and Canada arranged alphabetically by States and cities.

Paper Bag Manufacturers

The paper bag manufacturers of the United States and Canada are listed in this department, the lists being arranged alphabetically by States and cities.

Butter Dishes, Pie Plates, Etc.

Another department gives the names and addresses of manufacturers of paper, pulp and wooden butter dishes, pie plates, etc.

Other Classified Lists

Then there are also other departments giving alphabetically arranged lists of manufacturers of glazed and coated papers, and cardboard, manufacturers and importers of waxed papers, manufacturers and importers of vegetable parchment papers, envelope manufacturers, wall paper printers, etc.

Trade Association

In a separate department are given the titles of the various trade associations, with names of officers, addresses, etc.

Trade Customs

The trade customs officially adopted by the manufacturers and governing the sale of paper in the various grades are all printed in this department.

Watermarks and Brands

These departments of the book contain the most extensive record of the watermarks used in the American and Canadian

trade, embracing some 8,000 names, and are undoubtedly the most complete and accurate lists of these ever printed. They have been endorsed by the National Paper Trade Association.

Statistics of the Industry

This is one of the strong features of the book, and contains Government census figures as to paper and pulp production, pulp wood consumption, etc.

Mill Officers

This department gives you a complete, alphabetical list of all the mill officers or owners of plants, the first and only alphabetical list of mill officers that was ever published in any directory. It is strictly original in Post's Paper Mill Directory.

The Tariff

This department gives the official text of that portion of the tariff bill fixing the duties on paper and pulp.

Buyers' Guide to First Hands

Herein are set forth the names and addresses of firms and corporations who are "first hands" in all the departments of the paper and pulp industry, paper and pulp mill machinery, supplies and equipments, etc.

In a word, Post's Paper Mill Directory is an annual Encyclopedia of the Paper and Pulp Industry that is in daily use by paper manufacturers and dealers, paper buyers and sellers, and in fact by every one connected with the industry. It has proved itself a business necessity to the paper man.

Each edition is thoroughly revised, and is entirely set from new type each year, and is the only directory so reset. Its value as a paper and pulp reference book and as an advertising medium is therefore clearly apparent.

The 1910 edition is now ready for delivery, and orders should be sent in at once. *"It is an Honest Book."*
